

4 September 1963

REPLY TO  
ATTN OF: SQ SURGEON

SUBJECT: Monthly Activities Report for the Month of August 1963

TO: Commander  
WRSP-IV

1. The general health of the squadron throughout the month of August was excellent.
2. There were ☐ outpatient visits to the squadron surgeon during the reporting period. Patient breakdown as follows:

3.

Hospitalizations - 1; ☐ was hospitalized (Quarters) for one week for lacerations of fingers of his left hand. The injury was accidentally aquired in the base hobby shop. ✓

4. DNIF.

a. ☐ Phaumonia, phevmosoccic. Returned to flying duty 27 August 1963.

b. ☐ Strain, muscular, left trapezius. Returned to flying duty 27 August 1963.

c. ☐ lacerations, multiple, left hand.

5. Lovelace physicals on LAC pilots are being reviewed by squadron commander and surgeon to evaluate physical status and possible improvement areas.

6. FAA forms submitted to FAA. All pilots now current Class II.

7. Military and company personnel have received physicals, physiologic training, and chamber indoctrination. There were no failures of this course of instruction. Physicals are now being given by  STATINTL

Group to all LAC personnel. Chamber indoctrination will follow. LAC employees attended physiologic training courses given at WRSP-IV.

8. Medical section now fairly well prepared for remote staging. Will probably be completely prepared by end of September. The only lack will be in number of required personnel.

9.  took eight (8) days leave from 24 through 31 August.

Squadron Surgeon
